Dear Cheryl:

This office has reviewed the Revised Sampling and Analysis Plan for the Olin/McIntosh NPL site. Review of this document was augmented by the Preliminary Site Characterization Summary Volumes I & II, and by the Source Evaluation and the Hazardous Substance Indicator Parameter Technical Memorandums.

The stated objectives of the revised SAP, including source evaluation, clean closure equivalency, and determination of horizontal and vertical extent of contamination, have also been mitigated by the RCRA Facility Assessment conducted by an EPA Contractor.

We concur with the proposals set forth in this document as meeting regulatory objectives at both Operable Units 1 and 2.

Sincerely,

Joseph E. Downey
